Governance Record — Public Learning Surface UI v4.2 Stabilization

Date: 12 February 2026

Layer: Public Learning Surface (learn.agileai.university)

Classification: UI Stability Hardening

Version: v4.2

Status: LOCKED

## 1. Purpose

This governance record documents the controlled stabilization and mobile hardening of the Public Learning Surface following the formal freeze of UI v4.

The objective was not redesign, but deterministic reinforcement for:

- Mobile compatibility
- iPad and tablet optimization
- Navigation robustness
- Touch accessibility compliance
- Structural layout consistency

No visual identity changes were introduced.

## 2. Scope of Change

### A. Navigation Stabilization

- Explicit flex definition for nav layout
- Deterministic stacking for mobile viewports
- Improved alignment under 768px

### B. Header Adaptation

- Header inner layout responsive stacking
- Improved padding scaling
- Blur background retained but stabilized

### C. Content Layout Hardening

- Margin adjustments for mobile
- Font scaling under 1024px
- Improved text readability density

### D. Touch Accessibility

- 44px minimum touch targets enforced
- Preserved focus-ring accessibility layer

### E. No Change Areas

- Theme engine (3-state deterministic system)
- Reading progress system
- Ripple system
- Accessibility core
- Governance boundary architecture
- Institutional positioning

## 3. Architectural Impact

Impact Level: Low (Controlled Surface Layer Only)

No backend changes

No Firebase changes

No Portal integration changes

No Assessment logic changes

The change remains strictly within assets/css/site.css.

## 4. Strategic Context

Majority of users are mobile-first.

UI v4.2 ensures:

- Institutional readability
- Touch-device compatibility
- Cross-device consistency

- Surface confidence

This update supports revenue execution readiness without destabilizing architecture.

#### 5. Freeze Declaration

Public Learning Surface UI v4.2 is hereby frozen as:

Stable, mobile-compatible, governance-aligned, production-ready surface.

Further UI changes require governance entry.
