

# Governance Record — Phase■B (FINAL)

**Organization:** Agile AI University

**System:** Credential Architecture, Sharing & Verification

**Status:** FINAL · LOCKED · SHIPPED

**Change Authority:** NONE (unless explicitly unlocked)

**Date Locked:** 21 Jan 2026

## 1. Purpose of Phase■B

Phase■B governs how formally issued credentials may be shared and presented publicly, without altering issuance, validity, entitlement, or verification authority. The objective is to ensure institutional neutrality, verifiability, and user■controlled sharing.

## 2. Scope

### In Scope:

- Portal credential card UI
- Sharing language and semantics
- OpenGraph (social preview) behavior
- Separation of verification vs profile claiming
- User■controlled sharing mechanisms

### Out of Scope:

- Credential issuance logic or backend systems
- Eligibility or entitlement resolution
- Certificate PDFs or trainer artifacts
- Assessment or scoring systems

## 3. Phase■B Steps (Locked)

- **Step■1:** Sharing Language Lock — Neutral, institutional copy only.
- **Step■2:** OpenGraph Enforcement — Static, institutional OG on credential.html only.
- **Step■3:** Sharing Intent Separation — Explicit distinction between verification sharing and LinkedIn profile claims.

## 4. Architectural Guarantees Preserved

- Read■only rendering layer
- No UI■driven entitlement logic
- No backend mutation or data alteration
- Independent public verification retained
- Lifetime validity terminology preserved

## 5. Compliance Statement

Phase■B complies with institutional neutrality, verifiability requirements, non■gamified credential governance, and strict separation of issuance, rendering, sharing, and verification layers. No exceptions were recorded.

**Final Declaration:** Phase■B is hereby declared FINAL, LOCKED, and SHIPPED. Any future modification requires an explicit governance unlock and a new phase record.
