Agile AI University – Digital Constitution v1.0

Date Locked: 25 Feb 2026

Article I – Institutional Integrity

All digital systems must operate under governed architecture principles.

Article II – Measurement Unity

A single institutional analytics property governs all university surfaces.

Article III – Design Authority

Shared design-authority layer controls analytics, UI standards, and execution discipline.

Article IV – Surface Sovereignty

Each hosting target is self-contained and must follow registry standards.

Article V – Governance Enforcement

All architectural changes require formal version upgrades and cross-surface validation.

Article VI – Intelligence Responsibility

Institutional reporting must derive only from governed, taxonomy-approved events.

Article VII – Future Evolution

Any structural expansion requires explicit governance revision (v2.0+).
